DETAILED ACTION

Specification

The disclosure is objected to because it contains embedded hyperlinks and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlinks and/or other form of browser-executable code. See MPEP § 608.01.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 - the claim is replete with structure connected to "a drive shaft", "the drive shaft" or "said drive shaft". It is unclear to the examiner which drive shaft is referred to. The specification sets forth at least drive shaft -6- and drive shaft -11-. All the claims should be amended to maintain a clear definition of which driveshaft is being referred to. Further the applicant has set forth "optionally, a stand off assembly..." the use of "optional" language does not require the prior art to show a stand off assembly because the stand off assembly is not required by the claim language. If the applicant wants the stand off assembly to be included "optionally" should be deleted.

Art Unit: 3736

Claim 5 - sets forth "a drive mechanism" it is unclear how this structure corresponds to the structure of claim 1. Further are the "shuttle", the "follower" and the "fork" the same as set forth in claim 1?

Claim 6 - the claim is replete with structure connected to "a drive shaft", "the drive shaft" or "said drive shaft". It is unclear to the examiner which drive shaft is referred to. The specification sets forth at least drive shaft -6- and drive shaft -11-. All the claims should be amended to maintain a clear definition of which driveshaft is being referred to. The applicant has set forth "optionally, a stand off assembly..." the use of "optional" language does not require the prior art to show a stand off assembly because the stand off assembly is not required by the claim language. If the applicant wants the stand off assembly to be included "optionally" should be deleted.

Claim 15 - claim 1 sets forth a transmission only, it is unclear how a transmission would be altered as necessary for collection of semen.

Specification

Claims 4, 7, 13 and 14 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The dependent claims further limit the stand off assembly which is "optionally" included in

Art Unit: 3736

the respective independent claims and therefore not required. Because the stand off assembly need not be included in the base claim further limiting it does not further limit the respective base claims.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "altered as necessary" as claimed in claim 15, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of

Art Unit: 3736

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 6,632,185; 4,089,229; 5,676,497; and 2,081,796 teach related transmission structure.
